Race Sim Studio presents the **Formula RSS 2 V6 2020** car for Assetto Corsa.

If you have obtained this copy of the vehicle via illicit unpaid means, you are missing out on being up-to-date with our latest developments, improvements, updates, discounts and news. The support enables us to continue doing this work for you.

Car Installation Instructions

Copy the 'content' folder in this archive to your Assetto Corsa Steam installation folder:
        c:\Program Files (x86)\Steam\steamapps\common\assettocorsa

This will ensure you have installed the cars, fonts, driver and the texture folders.

If using the Content Manager software, just drag and drop the zip file onto the software interface, select the menu icon at the top-right of the interface, and press Install.

Frequently Asked Questions

Full details for installation, car painting template information, tyre packs and any other frequently asked questions can be found on our website.

Credits

Scott Shaw – 3D Modeller, textures, animations

Terms of Use

This car, or any of the cars created by Race Sim Studio, are not to be used in public or corporate events of any kind by public or private companies (such as simulators) or individuals without the expressed permission of RSS. For such circumstances, the email address listed below can be contacted for licensing agreements. In case of video game updates, which severely break this purchased content, the Race Sim Studio team will endeavour to update the produced content in its own time if there is the technical availability from the game. Do not redistribute, upload, modify or sell any of our work.

For permission and licensing queries, please reach out to Race Sim Studio at admin@racesimstudio.com
